

# Blackboard Tests

Blackboard provides the possibility to set-up online tests, of which the grades are stored in the Blackboard Gradebook. You can find the steps below, and an overview of the possible question types, in the QRC Building a Test.

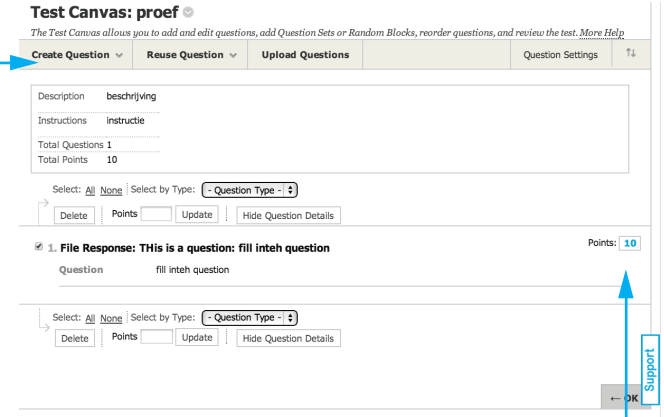

You can create a test by going to, **Course Tools > Tests, Surveys and Pools > Tests > Build Test**

**1. First you fill in the general information, such as the description of the test, a general instruction, and the name of the test. End with 'Submit'.**

**2. Next, you can create questions with 'Create Question',. Previously created questions can be re-used and randomised through 'Re-use Question'. In making questions, you can choose from many question types.**

**3. Questions you have created will appear in your overview. In the overview you can for example assign points to each question, and select which ones you want to use, and in which order.**

**Telephone:** 015 27 89194  
**E-Mail:** els@tudelft.nl

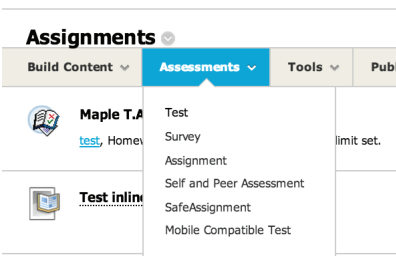

4. When you are satisfied with the test you have created, you can make it available to the students, by adding the test to the content of the 'Assignments' section.

Turn 'on' edit-mode in the top right

Edit Mode is: **ON**

Assignments > Create Assessment > Test > Select the test and click on 'Submit'

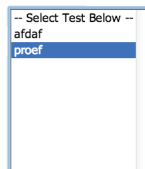

1. Add Test

Create a new Test or select an existing Test to deploy.

Create a New Test

Create

Add an Existing Test

Now, you can set the availability, description, password, type of feedback etc., and close off with 'Submit'.
