

# Self and Peer Assessment Tool

The Self and Peer Assessment Building Block allows an Instructor to create an exercise, composed of one or more Questions, each with one or more Criteria, to be presented to their Students for completion and evaluation. These Assessments, along with their Questions and Criteria, can be exported and then imported for later use.

Within a course go to **Assessment > Self and Peer Assessment**

Name the assessment and enter submission dates and other options. All explained in above each option. Click on submit.

## Getting Started

### 1 Create New or Import

Create a new assessment or import a previously exported assessment.

New or Import  New  Import

### 2 Assessment Information

Provide a name, instructions for the assessment, and dates for the submission process.

\* Name

### 4 Options

Date restrictions and availability apply to the content item. They are not

Make the assessment available  Yes  No

Track number of views  Yes  No

Choose date restrictions  Display After 02/15/2014   
Enter dates as mm/dd/yyyy

Display Until 02/16/2014   
Enter dates as mm/dd/yyyy

In the assessment Canvas create several questions > Create Question

To add a criteria, right side of the question name in the Assessment Canvas click on the (v) > select criteria > create criteria

## Assessment Canvas

Add and edit the questions to be responded during the evaluation process for this as

Set a criteria and the possible amount of points > submit

## Assessment Canvas

Add and edit the questions to be responded to during the submission process, and this criteria will only be visible during the evaluation process.

Create Question

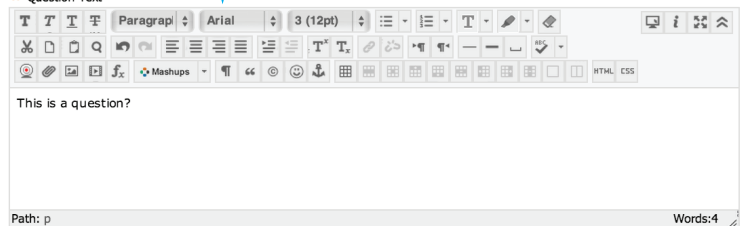

### Question 1

This is a question

### 2. Question Information

\* Question Text

### 3. Model Response

Providing a model response is optional. It allows evaluators to compare the responses in the submissions to an exemplary response. The model response can be made available at any time, but it will only be visible during the evaluation process, after the submission process has ended.

Model Response
